■ Carreira:

- Engenheiro de Testes de Software
- Instrutor de automação teste e desenvolvimento
- QA desde 2013

Baixando o Nodejs

Vamos a url:

<https://nodejs.org/en/download/>

Escolha o seu sistema operacional e faça o download
No meu caso é o Windows

The screenshot shows the Node.js website's 'Downloads' section. At the top is the Node.js logo and a navigation bar with links: HOME, ABOUT, DOWNLOADS, DOCS, GET INVOLVED, SECURITY, CERTIFICATION, and NEWS. Below the navigation bar, the 'Downloads' heading is followed by the text 'Latest LTS Version: 14.17.6 (includes npm 6.14.15)'. A paragraph states: 'Download the Node.js source code or a pre-built installer for your platform, and start developing today.' Below this, there are two main tabs: 'LTS' (Recommended For Most Users) and 'Current' (Latest Features). Under the 'LTS' tab, there are three options: 'Windows Installer' (highlighted with a red box, with the file name 'node-v14.17.6-x64.msi' below it), 'macOS Installer' (with the file name 'node-v14.17.6.pkg' below it), and 'Source Code' (with the file name 'node-v14.17.6.tar.gz' below it).
